DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 4, 6-11,13-15, and 18-39 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The order of using both scattered light before using only one scattered light critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The specification teaches how to 1) identify a first type of defect using the two scattered polarized lights before 2) identifying a second type of defect based on only one of the scattered lights. The claims are currently written such that the second step can be performed before the first step. Claims must include the order of using both scattered lights before using only one scattered light since the order is critical or essential to the practice of the invention.

Allowable Subject Matter

2. Claims 1, 3, 4, 6-11,13-15, and 18-39 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
